

DVS 600 III by Dallmeier integrated in Babylon!

DVS 600 III

Dear Sirs,

After the successful connection of the picture recording system **NiceVision® Pro** (AUTEC Aktuell 11/2004) and **Geutebrück** (AUTEC Aktuell 10/2005), now the digital video sensor system DVS 600 III by **Dallmeier** is integrated in Babylon, too.

Features:

- Live camera-streams on PC-monitor
- Camera choice (live vision) out of dynamic BABYLON graphics
- Display of records (no permanently saved tracks)
- Display of locally exported tracks
- Picture comparison (see flyer BABYLON Geutebrück)
- Processing of Dallmeier alarms
- Camera control, PC-controlled switching of sensors (sharp/diffuse) possible

The newly realized port with digital video sensor and recording system DVS 600 by Dallmeier works as well with all other existing multi-channel recorders of the third generation (short terms: DLS 6 S1, DMS 180 III Vs, DLS 24 S1, M-DMS 4, DMS 180 III Enterprise). Even the newest recorder of DMS 240 „In Memory of Leonardo“ (or as the case may be the DMS 80 and DMS 160 as new introduction recorders) should work with the most up-to-date Pview software.

Order No.	Description
XMP- NT-136	Integration of Dallmeier picture recording system DVS 600 III for live and historical video playing from dynamic graphics, alarm queue and alarm-logbook

If you have any questions, please do not hesitate to contact us.

Yours sincerely,

Your AUTEC - Team
