

## Most modern access control for checking identities using iris recognition!

Dear Sirs,

from now on it is possible to realize a biometric iris recognition in the Babylon system via LAN. **AUTEC** has integrated another biometric system together with a competent partner. It is the professional iris recognition from **Byometric® System AG**, with the fully automatic camera 'IRISPASS®-M' from one of the leading camera manufacturers **OKI®** connected to the door controller K32/K32Lite.

The feature is based on the same principle as in the professional face recognition FacePASS™ from **VIISAGE®**.

Order-No.	Description
XMP-K32-104	FacePASS interface via LAN . (K32/K32lite : Feature 5)

If you have any further questions, please do not hesitate to contact us.

With kind regards from Rhineland-Palatinate

Your AUTEC - Team
