

HeiTel's digital network recorder CamDisc SVR integrated in Babylon!

Dear Sirs,

With the versatile digital network recorder CamDisc SVR of the Kiel HeiTel Digital Video GmbH another high-end video product is integrated in Babylon to display directly live images or records of defined events. The CamDisc SVR is available as model for the connection of 4 or 10 analogue cameras. In the standard version the DVR records a total of 25 fps (frames per second), while the "SVR s" version even records up to 25 fps per camera, therefore in so-called "real-time". In practice every transmission path, whether analogue, digital, or by radio, can be used for the live transmission of video images as well as for evaluating the archive. At the same time the video images are stored on a removable hard drive in the device. The disc facilitates the rapid evaluation or absolutely safe archiving of data. From 2009 a new firmware release will ensure that as well IP cameras can be connected to the CamDisc SVR. This new firmware will be put at your disposal free of charge.

Functions of CamDisc SVR:

- Digital video transmission and recording system for 4 or 10 analogue cameras with integrated ethernet interface (DSL, LAN, WLAN) for image transmission, remote programming and service
- Optional additional transmission techniques: POTS/PSTN, ISDN, GSM/HSCSD
- Dedicated IP line with "HTconnect®" for secure access even with firewall protection
- Integrated webserver for video transmission and camera remote control via PC -, Smartphone -, PDA-Browser
- Triplex functionality (simultaneous live transmission, recording and archive evaluation)
- Recording speed up to 25 fps (SVR series) or real-time (SVR s series)
- Optional audio recording and transmission
- Calendar controlled permanent and motion or contact controlled recording for each camera selectable
- Event controlled connection via alarm contact, motion detection, technical alarm, routine
- E-mail alert message, camera position authentication, privacy zones
- Remote control of PTZ systems and 2 relay contacts
